

## INCIDENT COMMAND SYSTEM, PLANNING SECTION CHIEF

### OBTAIN AN INTERNATIONAL QUALIFICATION IN INCIDENT COMMAND

Planning plays a vital role in managing any incident, particularly large complex incidents. This course, presented by highly qualified Incident Management Experts, aims to provide a consistent knowledge and skill base for the members of Incident Management Teams that are responsible to perform the Planning function. This training is a prerequisite for the Incident Command System Planning Section Chief qualification.

#### **Course contents include:**

- Operational planning
- Resource tracking
- Resource summaries and displays
- Situation summaries and displays
- Incident action plans
- Incident meetings
- Briefings and information gathering.
